ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Contact Drying- Steam Cylinders/Cans

KERONE is having over 48 plus year's experience in designing and manufacturing of various type of Contact Drying- Steam Cylinders/Cans Our expertise with dryers and drying application, Contact Drying- Steam Cylinders/Cans the simplest and cheapest mode of drying fabrics.

Contact Drying- Steam Cylinders/Cans are essentially utilized for temporary drying instead of last drying and for pre-drying before stentering. Texture/drying material is passed around a progression of steam warmed chambers utilizing steam at pressures differing from 35 psi to 65 psi. Chambers can be utilized to dry down a large number of textures, yet it gives a completion like an iron and is in this way unacceptable where a surface impact is available or required. In stenters, the texture is width wise extended for width obsession by a progression of holding clasps or pins mounted on a couple of vast chains

It is normal for steam chambers to have issues, for example, spills at vacuum breakers, air vents, turning joints and steam traps. This is an immediate consequence of the plan of the warming framework which depends on passing steam and condensate into and out of every chamber by means of a pivoting joint. At the point when you have up to perhaps 32 such chambers in a solitary bank then the potential for spillage is extensive. Starting a decent upkeep regime is consequently significant. For instance: occasionally checking steam traps utilizing a ultrasonic steam spill indicator.

Features

- Closed construction available
- Minimize vapor nuisance
- Avoid dust contamination
- Maintains low RH air blanketing
- For inert gas blanketing
- Melts with wetting property to metal surface, can be flaked
- For maintenance of suction conditions for purposes of operator comfort

Application

- Plastic Film Production
- Papermaking
- Textile Industry
- Food Processing
- Converting Industries
- Printing
- Wood Processing
- Metal Coating
- Chemical Processing
- Film and Coating Production

THANK YOU
