About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

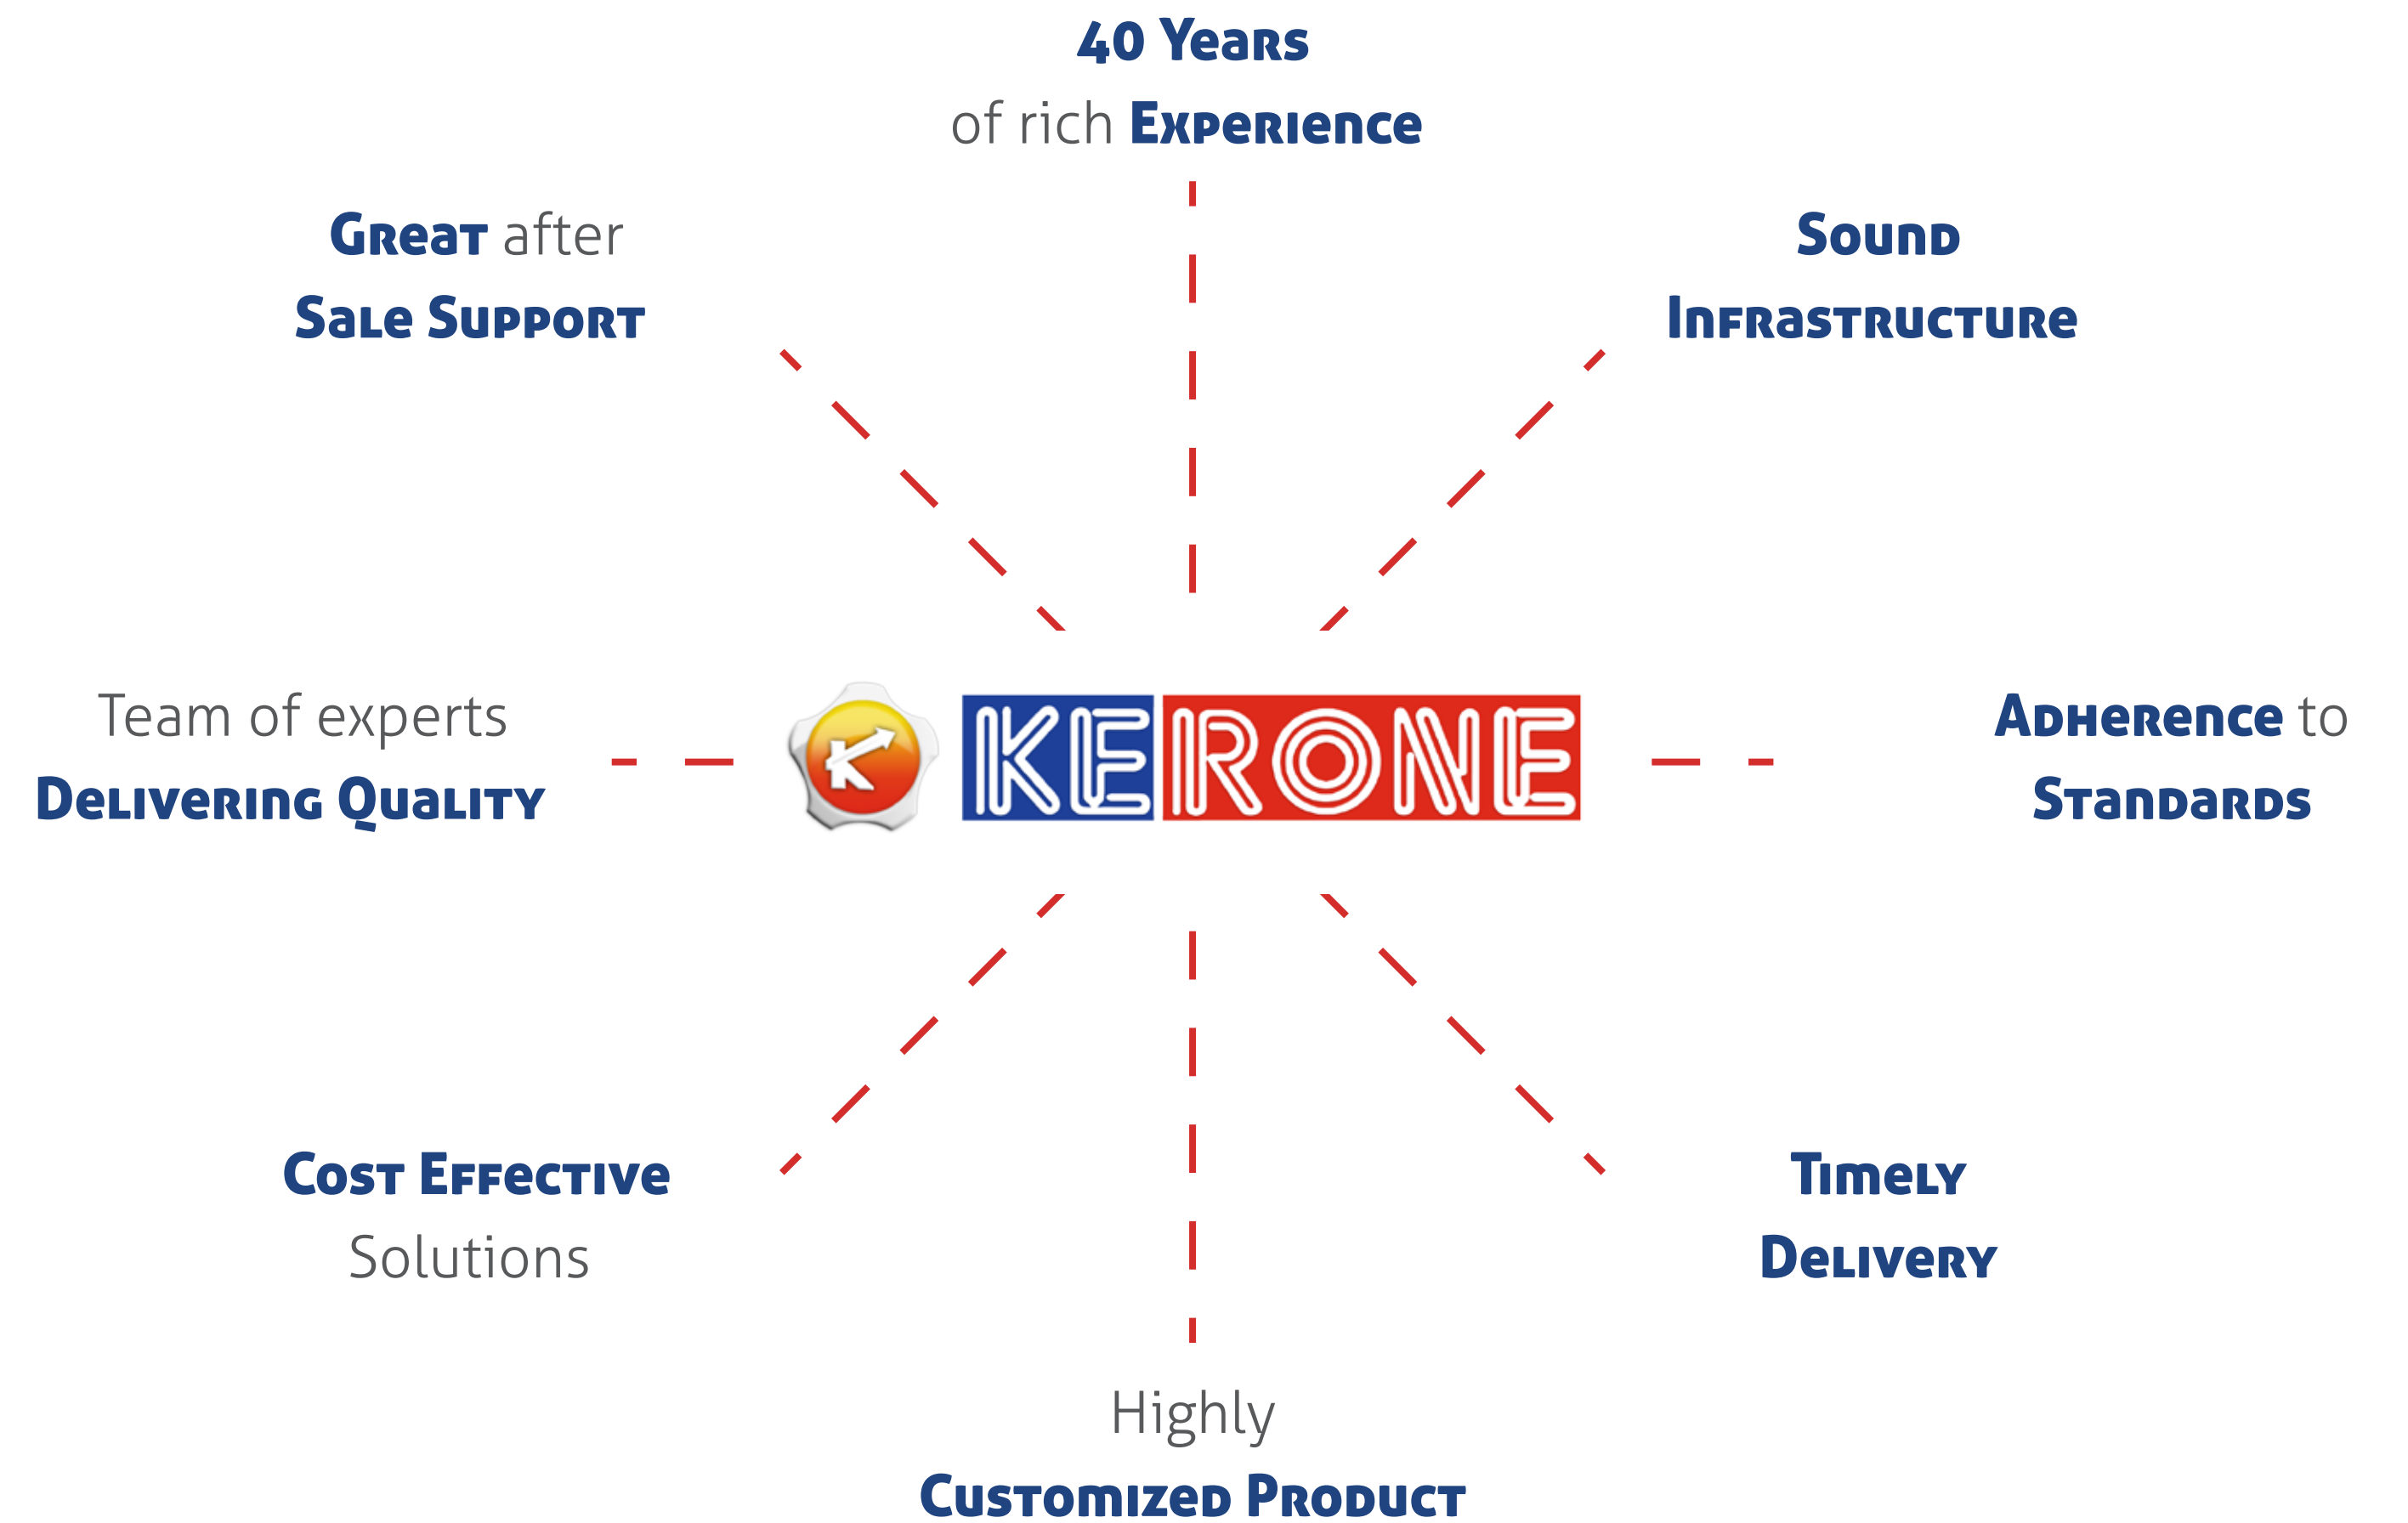

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to

Twin Tube Medium Wave Infrared Heater

Medium wave infrared heaters manufactured as in Twin tube structure offers higher heat generation and exchange rate, twin tubes can be manufactured in different tube formats as per the desired length.

The 8-shaped high quality and pure quartz twin tube medium wave infrared heaters.

Application

- Shrink Packaging Machines.
- Drying Textiles.
- Lamination Industries.
- Rubber Curing.
- Drying of paints
- Processing Plastic foils and sheet

Features

- The heating and cooling time is one second approximately.
- They are available with gold reflectors and also without reflectors.
- The outer rear side of the reflector tube is gold coated.
- Power saving by preventing heat loss from the rear end by the reflector.
- Prevention of heat loss makes the surrounding work area cooler.
- Enhanced efficiency and directionality of the heater.
