Of experience

MIXING KETTLE

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Mixing Kettle

All the mixing kettles manufactured by the KERONE are tailor made based on the your specification, process need, floor area, number of inlet and outlet requirements, type of coating for both internal surface and external surface based on the your process requirements.

Kerone Engineering Solutions Limited provides various superior Mixing Plant/Hot Melt adhesive mixing plants for its customers. The KERONE hot melt adhesives plant consists of unique materials that are specifically intended for diverse uses which include simple treatment, compact manufacturing or final product protection.

Materials that are broadly utilized in multiple different markets ranging from electronics, medical, automotive, furniture and food & beverage are built on high bond strength, low application cost and processing safety.

It requires a special plant and machinery for producing hot melt adhesives which have significantly increased the quality, productivity, flexibility and ecological performance of both, sealing as well as waterproofing sheets.

Hot-melt product comes in different forms such as stick, granules, pad, pillow, block, and many more.

Application

- Automobile
- Pharmaceutical
- Textile
- Paper and Printing
- Food and brewage processing
- Dairy and Dairy products
- Plastic and Rubber
- Ceramics
- Chemical

Features

- Tailor made to fit your requirements
- Highly customizable
- High performance
- Highly controllable
- Corrosion free
- Variable mixer speed
- Built with the high quality stainless steel material or special Alloys
- Very efficient, uniform mixing, heating and cooling

Advantages

- Integrated Design-Build Facilities
- Highly customizable
- Modular Design and Fabrication
- Flexibility
- Scale-Appropriate Solutions
- Retained Knowledge and Skill
- Safety
- Quality Assurance
- Unique Fast-Track Project Execution Methodology

Chemical Kettles

most widely find application in chemical plants, paint manufacturing, pharmaceutical industries and etc. These kettles are made with very precise care to avoid any shortfall such as correction of kettles, avoid any chemical reaction with the surface material, the inlets and the outlet flow, the rate of rise of temperature (heating rate) and rate of decrease of temperature (cooling rate).

Mixing Reactor

Mixing reactors are very commonly used for the solids dissolution, product mixing, chemical reactions, batch distillation, crystallization, liquid/liquid extraction and polymerization. The mixing reactors are the process equipments, within which the major chemical reactions take place. KERONE designs and manufacture the customized mixing reactors based on your process requirements. The mixing reactors built by KERONE are to achieve high efficiency, low operating cost, and control and feedback mechanism.

Mixing Reactor with heating/cooling system

At KERONE, we manufacture the high quality, custom developed mixing reactor of both batch type and semi batch type with the heating/cooling systems as per your process requirements. The heating/cooling systems embedded in the mixing reactors are such that it provides high level control and increase the overall system efficiency

Process Reactor

KERONE is having over 48+ years of experience in designing and manufacturing high quality process reactors based on your process requirements. We manufacture process reactors of industrial scale, of various types such as batch type, continuous type, and semi-batch type. Our process reactors find application is industrial processes such as Adhesives processing, Agriculture, Chemical processing, Cosmetics, Food and beverage production, Paints and coating production, Paper and pulp processing, Pharmaceutical and medical production, Plastics and thermoplastics processing.

OUR CLIENTS

THANK YOU
