CO₂ CAPTURE

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

CO2 Capture

Kerone is committed to spearheading the fight against climate change by developing cutting-edge CO2 capture technologies aimed at reducing the atmospheric concentration of greenhouse gases. With a focus on expertise, innovation, and environmental responsibility, our company is dedicated to providing efficient solutions to mitigate the excess amounts of CO2 in the atmosphere. Through collaboration with various sectors such as energy production, manufacturing, and transport, we tailor specific solutions to meet sustainability targets and address governmental mandates.

Our Carbon dioxide capture technologies not only reduce emissions but also create opportunities for the development of new markets, particularly in carbon trading. Utilizing innovative technologies, we design solutions that offer environmental benefits while paving the way for a low-carbon future. Our efforts in capture, transportation, and geologic storage of CO2 involve a range of technologies aimed at enhancing efficiencies in separation techniques for common industrial emissions gases. These efforts encompass various capture processes tailored to specific industry processes or power plant types, reflecting our commitment to sustainable practices and a greener tomorrow.

Features

- Advanced CO2 capture tech
- Focus on innovation & eco-responsibility
- Tailored solutions for sectors
- Reducing greenhouse gas levels
- Creating new carbon markets
- Efficiencies in separation
- Innovative, eco-friendly tech
- Commitment to low-carbon future

Advantages

- Improves air quality and public health.
- Encourages innovation in clean technology.
- Fosters environmental responsibility.
- Helps meet sustainability targets.
- Contributes to a low-carbon future.
- Supports compliance with governmental regulations.
- Enhances corporate social responsibility efforts.

Application

- Energy production
- Carbon-intensive industries
- CO2 capture plants are essential in reducing emissions from power plants fueled by coal, natural gas, or biomass.
- They are utilized in capturing CO2 emissions from waste incineration and landfill sites to prevent them from entering the atmosphere.

OUR CLIENTS

THANK YOU
