Of experience

ENVIRONMENTAL TEST CHAMBER

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Environmental Test Chamber

An environmental chamber, also known as a climatic or climate chamber, is an enclosure designed to simulate extreme environmental conditions, enabling clients to manufacture high-quality, reliable, and sustainable products. These chambers test the effects of temperature, humidity, and freezing points on materials and products, providing valuable insights into biological changes, efficiency, lifespan, and corrosion resistance. KERONE's environmental test chambers are customizable to meet client-specific requirements, varying in size and environmental conditions based on the complexity of the test. They typically feature viewports or video feeds for visual inspection during tests.

KERONE's environmental test chambers boast a double-wall exterior made of galvanized iron with a powder coating and a flush-fitting insulated door with a magnetic gasket. The inner chamber is constructed from 304 quality stainless steel, and the Plexiglas inner door allows for specimen inspection without disturbing the temperature. Adjustable tray shelves, a refrigeration evaporator, radiator, and divergent constrained air circulator ensure positive airflow within the chamber. Optimal temperature levels are maintained by a hermetically sealed compressor located beneath the unit, while a kettle with an immersion heater and water level controller provides humidity. The solid-state temperature controller and digital display control both humidity and temperature, ensuring precise environmental simulation.

Features

- Temperature Control
- Humidity Control

- User-Friendly Interface
- Altitude Simulation
- Vibration Control
- Lighting Systems
- Construction and Insulation
- Gas Supply and Control
- Data Logging and Reporting

Advantages

- Reproducibility
- Quality Control
- Temperature Control
- Reliability Testing
- Customization
- Safety Testing, Compliance Testing
- Accelerated Testing
- Precise control over heating process

Application

- Cement plants
- Rubber industries
- Pharmaceutical companies
- Paint and varnish
- Test the for the packaging
- Electrical and electronic component manufacturers

OUR CLIENTS

THANK YOU

UNIT 1

4 & 5, Marudhar Industrial Estate, Gas Godown Lane, Goddev Fatak Road, Bhayander (E), Dist. Thane - 401105. (India)
