ETHANOL RECOVERY PLANT FROM CORN COB

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Ethanol Recovery Plant From Corn Cob

The Ethanol Recovery Plant from Corn Cob stands as an innovative and sustainable solution in biofuel production, utilizing abundant agricultural waste to produce clean and renewable energy. Through a series of chemical and mechanical processes, the plant efficiently extracts ethanol from maize cobs, turning what was once considered agricultural waste into a valuable resource. By fermenting the sugar-rich cellulose and hemicellulose components of corn cobs, ethanol is generated as a biofuel, offering an environmentally friendly alternative to fossil fuels. Our facility combines sustainability and innovation, employing advanced methods to ensure efficient ethanol recovery while promoting a circular economy.

Each step of the production process, from corn cob harvesting to ethanol extraction, reflects our commitment to environmental responsibility and the creation of a cleaner, more sustainable future. Through the utilization of agricultural leftovers and the reduction of reliance on fossil fuels, the Ethanol Recovery Plant from Corn Cob exemplifies a greener approach to ethanol production, contributing to a more environmentally friendly energy landscape.

Features

- Corn Cob Collection System
- Fermentation Tanks
- Distillation and Separation
- Ethanol Storage and Distribution
- Quality Control and Monitoring
- Innovation in green technology.
- Fermentation by microbes to produce ethanol.
- Circular economy promotion by using agricultural waste.

Advantages

- Utilization of abundant agricultural waste
- Drives technological innovation.
- Reduces carbon footprint.
- Promotes sustainable agriculture.
- Promotes circular economy.
- Renewable energy source.
- Enhances energy independence.
- Creates economic opportunities.

Application

- Biofuel production
- Industrial solvents
- Pharmaceutical industry
- Green Energy Generation
- Renewable energy
- Promotes greener energy solutions.
- Environmental remediation

OUR CLIENTS

THANK YOU

UNIT 1

4 & 5, Marudhar Industrial Estate, Gas Godown Lane, Goddev Fatak Road, Bhayander (E), Dist. Thane - 401105. (India)
