ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Flask Cure Infrared Refineries

Flask Cure Infrared Refineries is a prime example of an innovative solution for oil and gas operations. Flask Cure Infrared Refineries is a very advanced catalyst with high refining power, making the refinement process more efficient and precise. Using the physical attributes of infrared radiation, Kerone refineries are able to adjust distillation processes so that crude oil is transformed into high-quality fuels and byproducts.

Kerone infrared refiners are high-tech products, using Flask Cure as an integrated part of the refinement process to further optimize catalyst performance. This technology provides the faster speeds, higher yields and greater energy efficiency. Flask Cure Infrared Refineries will be a standard in the industry from now on.

We customize wide range of Flask Cure Infrared Dryers best on the specialized need of client/process demand. The dryers are of high quality and high performance. High efficiency, low power consumption and compact size are the factors which lead to clients appreciating the range of dryers available.

Features

- Easy to Handle and very less maintenance
- Robust & compact Construction
- Properly insulated against loss of radiation
- Highly controllable, electronics control panel
- Both Batch and continuous mode of operations can be achieved
- Precious quality of Raw materials such as Infrared emitters, steel used of the casing

Advantages

- Maximizes output from the refining process
- Efficient and precise refinement process
- Delivers reliable and consistent results
- Utilizes physical attributes for optimal distillation
- Transforms crude oil into superior fuels and by products
- Increases the speed of refining processes
- Reduces energy consumption, enhancing sustainability
- Advanced technology for oil and gas operations.

Application

- Reduced Environmental Impact
- Improved Energy Efficiency
- Flexible Integration
- Safety and Reliability
- Quality Product Output
- Enhanced Crude Oil Refining
- Adaptability to Future Technologies

OUR CLIENTS

THANK YOU
