Of experience

GAS FIRED HOT WATER GENERATORS

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Gas Fired Hot Water Generators

As a dedicated heater manufacturer, we specialize in producing Gas Fired Hot Water Generators, which are widely used in high-temperature applications. These generators boast a compact design that saves significant space while their robust mechanical construction ensures high performance over extended periods. In gas-fired heaters, a burner is supplied with gas through a control valve and thermostat switch, with exhaust gases vented either through a central hollow core or around the tank sides. The gas-fired heaters heat the tank, subsequently heating the water. These hot water generators are fully automated, packaged units ready for installation anywhere space permits, without needing a specialized boiler room. Falling outside the Indian Boiler Regulations, these efficient systems deliver hot water much faster than conventional methods, with heat outputs ranging from 70,000 kcal/hr to 1,000,000 kcal/hr, and hot water outputs from 1,250 l/hr to 18,200 l/hr at approximately 65°C.

At KERONE, with 48+ years of experience, we specialize in crafting tailored industrial machines. Our gas-fired hot water generators boast heavy-duty construction and precise airflow handling, ideal for tough environments. We offer customized machinery meeting diverse industrial needs, ensuring durability and reliability. Our equipment, including dryers and hot water generators, is crafted with meticulous attention to detail, guaranteeing top-notch performance and functionality for our valued clients.

Features

- Temperature and Pressure Controls
- Electronic Ignition System
- Water Circulation System
- Delivers hot water quickly for increased efficiency
- Built to withstand harsh industrial environments.
- Ready-to-install units with minimal setup required

Advantages

- Rapidly heats water, providing hot water faster than conventional systems
- Fast Heat Output
- Features heavy-duty construction for long-term durability and effective operation.
- Compact Design
- Suitable for various industrial applications due to its rugged design and precise airflow handling.

Application

- Pharmaceutical Industry
- Hospitals and Healthcare Facilities
- Agricultural Sector
- Industrial Processes
- Food Industry
- Used in dyeing, finishing, and washing processes requiring hot water

OUR CLIENTS

THANK YOU
