# ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

# WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

## MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

## VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

# TRUSTED PARTNERS

## Hot Water Generator and Heat Exchanger

Heat exchangers and hot water generators stand as indispensable pillars within the industrial landscape, offering reliable solutions for a myriad of heating and cooling applications. These intricately engineered systems epitomize efficiency and sustainability, harnessing diverse energy sources to elevate water temperatures for industrial processes. By seamlessly transferring thermal energy between fluids, they mitigate energy loss while ensuring a consistent supply of hot water, thereby curbing operational costs and fostering environmental stewardship. From biomass to electricity, these versatile apparatuses adeptly cater to the diverse needs of industries, serving as the cornerstone for energy recovery, heating, and cooling operations worldwide.

In energy-intensive industries, heat exchangers are crucial for optimizing efficiency and extending equipment lifespan. Their role in regulating fluid temperatures prevents downtime and enhances productivity. Beyond functionality, they symbolize innovation and progress, supporting global sectors in meeting modern industrial demands, reducing energy consumption, and promoting sustainable growth.

### Features

- Hot Water Generator
- High Thermal Efficiency
- Versatility in Fuel Options
- Efficient Heat Transfer
- Durable Construction

- Adaptive Design
- Customization Options
- Low Maintenance Requirements

### Advantages

- Energy Efficiency
- Consistent Performance
- Temperature Control
- Quick Heating
- Compact Design
- Customization Options
- Compliance with Standards
- Reduced Environmental Impact

### Application

- Industrial Processes
- Renewable Energy Systems
- HVAC Systems
- Power Generation
- Food and Beverage Industry
- Commercial Buildings
- Waste Heat Recovery
- Pharmaceuticals and Healthcare
