Of experience

MICROWAVE HEATING FOR TEXTILE

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Microwave Heating For Textile

Microwave Heating for Textiles marks a significant advancement in textile treatment and processing, revolutionizing traditional methods with its ability to circulate heat uniformly within fabrics, leading to quicker processing times and consistent outcomes. By harnessing electromagnetic waves, this innovative process rapidly dehydrates, hardens, and enhances adhesion within fabrics. Additionally, controlled microwave power usage not only elevates product quality but also reduces energy consumption, making it an environmentally friendly option.

Covering dyeing, finishing, sterilization, and moisture removal, microwave heating offers myriad benefits to the textile industry, enhancing productivity and promoting sustainable production practices. Given the indispensable nature of drying in textile manufacturing, where soaking is prevalent throughout the production process, microwave heating emerges as a vital solution for efficient and sustainable textile production.

Features

- Functional Life Of System Is Large
- Low And Easy Maintenance
- Compressed Assembly
- Speedy And Easy Installation
- Hassle-Free Working
- Accurately Premeditated And Engineered

- Longer Service Life
- Rugged Construction
- High Toughness
- Energy And Cost Efficient
- Highly durable
- Power Saving
- Efficient performance

Advantages

- Lesser Processing Time
- Selective Heating Or Drying
- Lesser Power Consumption
- Easy Adaptability
- No Pigmentation On Output
- No Residual Production
- Lesser Floor Area Required
- Improve Reproducibility

Application

- Enables uniform heat circulation within fabrics for quicker processing.
- Enhances productivity and promotes environmentally friendly production methods.
- Utilizes electromagnetic waves for rapid dehydration, hardening, and adhesion enhancement.
- Improves product quality and reduces energy consumption through controlled microwave power usage.
- Beneficial for dyeing, finishing, sterilization, and moisture removal processes in the textile industry.

OUR CLIENTS

THANK YOU

UNIT 1

4 & 5, Marudhar Industrial Estate, Gas Godown Lane, Goddev Fatak Road, Bhayander (E), Dist. Thane - 401105. (India)

Contact Us
