ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Steam Conveyor Ovens

Steam conveyor ovens seamlessly combine steam technology with conveyor efficiency, revolutionizing the drying and cooking experience. Designed to deliver consistent results for every product, these ovens ensure perfect drying and cooking while retaining moisture, natural flavors, and nutrients, resulting in juicy and tender meals. The steam infusion enhances the preservation of food and other materials, making it ideal for various applications. Built with strong, high-quality components, these ovens are durable enough for any industrial environment, ensuring long-lasting performance.

The conveyor belt system in steam conveyor ovens significantly enhances their functionality and efficiency. By continuously moving food items through the cooking chamber at a controlled pace, the conveyor belt eliminates the need for conventional stationary racks, ensuring uniform exposure to cooking elements. This automation optimizes throughput and minimizes manual intervention. The adaptability of these ovens is another major advantage, allowing chefs to precisely adjust temperature, humidity, and conveyor speed to meet the unique needs of various foods, from delicate pastries to hearty meats. Equipped with user-friendly interfaces and programmable controls, steam conveyor ovens simplify the cooking process, reduce labor costs, and increase overall productivity. Moreover, they promote better health and safety by preserving nutrients and flavors and ensuring precise cooking temperatures to eliminate harmful microorganisms. At Kerone, we produce advanced conveyorized heaters and dryers with perforated belts, allowing steam or air to pass through the material for optimal heating and drying in multiple zoned units with varying temperature profiles and controls.

Features

- Unit can have integral cooling section
- Very close contact with Steam
- Can vary flows between zones
- Careful handling of product
- Programmable speed control
- Excellent transfer of energy from point to point
- Self contained with distributed foundation loading

Advantages

- Built with strong, high-quality components for long-lasting performance
- Precise Control
- Consistent Results
- Moisture Retention
- Frees up kitchen staff for other tasks, increasing overall production
- Suitable for a wide range of foods, from pastries to meats

Application

- Beverage Industry
- Food Industry
- Textile Industry
- Seafood Processing
- Vegetable Processing
- Prepared Meals
- Pharmaceutical Industry

OUR CLIENTS

THANK YOU
