

48⁺ Years
Of experience

STEAM / THERMAL / FLUID

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Steam / Thermal / Fluid

Steam, thermal, and fluid dynamics are integral to diverse engineering applications, optimizing the utilization and movement of heat and energy across various settings. Steam, the gaseous phase of water produced when heated to its boiling point, is widely used in industrial operations and for providing mechanical or electrical power. Its unique properties, such as its expansive nature and high latent heat, make it an effective energy transmission medium. This has led to its extensive use in modern civilization, from industrial boilers and steam engines to power plant steam turbines. The application of steam has driven innovation and advancement across many areas, including chemical, mechanical, and environmental engineering, as well as aerospace engineering. Understanding these phenomena is crucial for developing efficient systems, optimizing energy use, and improving industrial processes.

Thermal energy, critical for climate control and power production, relies on fluid dynamics for efficient heat transfer. Fluids, both liquid and gaseous, influence heat exchange in engines and transport networks. Achieving thermal efficiency means maximizing heat delivery while minimizing fuel consumption. This is especially crucial in manufacturing high-grade products like pharmaceuticals and specialty chemicals, requiring precise temperature control. KERONE designs tailored systems for efficient heat transfer, ensuring optimal production conditions and maintaining desired temperatures effectively.

These Hot Air Generators are distinguished based on the type of medium used

- Steam Heaters
- Thermal Heaters
- Fluid Heaters

Features

- Optimized for maximum thermal efficiency
- Essential for high-grade product manufacturing
- Accommodates both liquid and gaseous fluids
- Minimizes fuel consumption while maximizing heat delivery
- Ensures consistent and effective temperature management
- Incorporates the latest technology for optimal heat exchange

Advantages

- Optimizes the movement and utilization of heat
- Suitable for climate control, power production, and industrial processes.
- Essential for manufacturing high-grade products like pharmaceuticals and specialty chemicals.
- Supports high-quality production by maintaining desired temperatures efficiently.

Application

- Steam Heating System
- Industrial Processes
- Power Generation
- Fluid Heating System
- Oil and Gas Industry
- Heat Exchangers
- Thermal Heating System

OUR CLIENTS

THANK YOU

UNIT 1

4 & 5, Marudhar Industrial Estate, Gas Godown Lane, Goddev Fatak Road, Bhayander (E), Dist. Thane - 401105. (India)

Contact Us
