Of experience

THERMOCOUPLE CERAMIC INFRARED HEATERS

In Association with SVCH-Technologii, Moscow (Russia)

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

ABOUT US

KERONE is now renowned for serving the specialized needs of customers with the best quality and economical process of application engineering solutions and industrial heating products manufactured in a high-quality environment by a trained and qualified workforce (special purpose machinery)

KERONE is a pioneer in application and implementation engineering with its vast experience and team of professionals.

KERONE is devoted to serve the industry to optimize its operations both economically and environmentally with its specialized process engineering solutions.

KERONE is having immense expertise in manufacturing and implementing various types of engineering solutions.

KERONE is possessing employee strength of more than 280+ experts continuously putting efforts for happy industrial engineering solutions

48+ Years Manufacturing Excellence

Great Sale Support

Highly Customized Product

Adherence to Standards

Sound Infrastructure

Team of experts Delivering Quality

Timely Delivery

Cost Effective Solutions

WHY CHOOSE US

"Choose Kerone for innovative solutions tailored to your unique product needs, ensuring efficiency, reliability, and unmatched quality."

With decades of expertise, cutting-edge technology, and a customer-centric approach, Kerone Engineering offers tailor-made Applications Engineering solutions that prioritize quality, flexibility, and cost-effectiveness. Benefit from our commitment to excellence, post-sales support, and innovative solutions for your unique Applications Engineering needs. Choose Kerone Engineering for reliability, performance, and unmatched value.

MISSION

To enhance the value of customer operation through our customer need centric engineering solution.

We are committed to providing our customers with unique and best-in-class products in the industrial thermal processing segments. Through strategic tie-ups for technical know-how with renowned leaders in industry-specific segments, we ensure that our offerings meet the highest standards of quality and innovation.

VISION

Turn into a world leader in providing specialized, top-notch quality and ecological industrial heating, cooling, and drying solutions across the globe.

To attain global recognition as the best of quality and environment-friendly engineering solution company.

Enhance the value of customer operation through our customer need centric engineering solution.

TRUSTED PARTNERS

Thermocouple Ceramic Infrared Heaters

Thermocouple Ceramic Infrared Heaters represent a breakthrough in heating technology, harnessing the unique qualities of ceramic materials for exceptional thermal efficiency. Operating on the principle of converting electrical energy into radiant heat, these heaters emit infrared radiation directly onto target surfaces, ensuring rapid and uniform heating with minimal energy waste. Their responsiveness is remarkable, with quick heating times eliminating the need for preheating and reducing downtime in industrial settings, thereby increasing productivity without compromising quality.

Moreover, these heaters prioritize environmental responsibility and sustainability, reducing energy consumption and carbon emissions while promoting long-term resource conservation and waste reduction. Built with a focus on quality and dependability, they boast sturdy construction and durable components, guaranteeing extended operation even in demanding industrial environments. Incorporating cutting-edge technologies, such as thermocouples made of Nickel and Nichrome (Nicer-Ni), these heaters can be seamlessly integrated with automation systems and process controls for improved accuracy and efficiency. As pioneers in industrial heating solutions, Thermocouple Ceramic Infrared Heaters set new benchmarks for performance, adaptability, and reliability, empowering companies across various industries to enhance manufacturing processes and achieve excellence in the modern era.

Features

- Construction of temperature control system is very easy.
- The operating temperature remains constant and is reached very quickly.
- There is no impact of voltage fluctuation and air flow.
- The temperature remains constant even in no-load operation
- It has energy efficiency and environmental protection benefits
- Heat losing in the non-radiation surface is small.

Advantages

- Efficient and quick heating
- Precision-focused heat distribution
- Versatility for various applications
- Easy integration into different environments
- Health benefits for improved comfort
- Quiet operation and low maintenance
- Environmental sustainability through reduced energy consumption.

Application

- Vacuum forming machine, Compression Molding Machine
- Printing ink dryer, PCB repair station, Electric heating tables
- Angle iron, Aluminum windows paint stove
- Footwear processing, tape, plywood heating

OUR CLIENTS

THANK YOU

UNIT 1

4 & 5, Marudhar Industrial Estate, Gas Godown Lane, Goddev Fatak Road, Bhayander (E), Dist. Thane - 401105. (India)
